EDUCATION

University of British Columbia

Vancouver, BC

Bachelor of Science in Statistics (GPA: 3.8)

Expected: May 2028

- Relevant Coursework: Databases in Data Science; Finding Relationships in Data; Applied Machine Learning; Introduction to Statistical Inference; Time Series and Forecasting; Statistical Inference for Data Science
- Award: **3rd (2025) and 4th (2026)** at UBC BOLT Datathon, judged by **Microsoft, Meta, Deloitte, and EY**.

EXPERIENCE

Direct Energy (NRG Energy subsidiary · Fortune 200)

May 2026 – Present

GTM Data Analyst Intern

Calgary, Alberta

- Analyze customer contract history data across Oracle, Databricks, and Power BI, using Python and Excel, to extract actionable insights and validate and refine GTM strategy for electricity and natural gas acquisition campaigns.
- Unify **10+ Oracle schemas** into a single Power BI-ready dataset via an **end-to-end ETL pipeline**, implementing NULL imputation, outlier remediation, and feature engineering to improve downstream analytical reliability.
- Analyze **100M+ customer records** in Power BI to detect early cancellation patterns prior to electricity and natural gas onflow, and pinpoint key risk segments to support proactive churn reduction efforts.
- Translate analytical findings into clear narratives and present insights cross-functionally to GTM Marketing, Product, and Customer Management teams to align stakeholders and inform data-driven retention strategy.

Reading Gate | Excel, Tableau, Microsoft PowerPoint

Mar. 2024 – April 2026

Part-time Data Analyst & Mathematics Tutor

Burnaby, BC

- Built Tableau dashboards to visualize academic progress and cut report build time by 30% through automation.
- Delivered program offerings through PowerPoint presentations to clients, leading to 20+ new student enrollments.

Korean Intercollegiate Student Society | Excel

 Sep. 2022 – Aug. 2024

Data & Finance Team Member

Vancouver, BC

- Generated over \$4,000 in revenue and attracted 200+ participants by co-hosting a Halloween event in partnership with Ombre Show Lounge Nightclub.

PROJECTS

End-to-End Movie Analytics ETL Pipeline | Python, Oracle, MongoDB, Git

 April 2026

- Built an end-to-end ETL pipeline to ingest IMDb and YouTube sentiment data and load structured tables into Oracle.
- Designed relational schemas and ER diagrams with primary and foreign keys for structured analytics data in Oracle.
- Implemented an Oracle data loading layer using oracledb with automated table creation, primary/foreign keys, type-safe inserts, and commit/rollback transactions.

UBC Datathon (3rd place out of 40 teams) | Tableau, Google Slides, Python

 Oct. 2025

- Earned 3rd place out of 40 teams for business impact and data clarity by delivering a presentation that integrated Tableau and Python-generated visualizations with strategic storytelling.
- Judged by professionals from Microsoft, Meta, Deloitte, EY, EA, and other industry-leading companies.

Vancouver Traffic Accident Analytics Dashboard | PostgreSQL, Tableau

 July 2025

- Cleaned 200K+ traffic records in PostgreSQL by removing duplicates, handling NULLs, and standardizing data.
- Aggregated accident data to compute safety KPIs, including YoY trends and high-risk location metrics.

Detecting Fraudulent Transactions | Python (Pandas, Numpy, Seaborn, Scikit-learn)

 June 2025

- Applied SMOTE to address an imbalanced dataset (0.17% fraud), improving sensitivity to fraudulent transactions.
- Trained and evaluated a Random Forest classifier, achieving a strong F1 score of 0.85 on held-out test data.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Scikit-learn), SQL (PostgreSQL, Oracle), R, Java

Data Visualization: Tableau, Power BI, Looker, Matplotlib, Seaborn, Microsoft Excel, Google Sheets

Data Platforms: MongoDB, Snowflake, Databricks, SQLite, Google BigQuery, Azure Synapse

Data Engineering: Apache Spark, Apache Airflow, Apache Kafka, dbt, AWS, Docker, Git
